## PROJECTS

### E-Commerce-smart-shop

The project is an e-commerce platform aimed at selling products online. The project includes a set of features and functions such as displaying products, shopping cart, purchase process, search, filtering, etc. that facilitate the electronic shopping experience for users.

**Project techniques:** React.js | Redux Toolkit | sass  
[GitHub](#) [Live](#)

### Instagram

I developed the Instagram project. The project is an identical copy of the famous Instagram application. When logged in, it allows users to view the profile, share photos and videos, search, explore, and interact with other people's posts.

**Project techniques:** React.js | Redux Toolkit | Css  
[GitHub](#) [Live](#)

### E-Commerce\_tasty\_treat

I developed the E-commerce Restaurant project. The project is a platform for online restaurants. The project includes a set of features and functions such as the food menu, adding meals to the cart, customizing orders, the purchase and payment process, account management, and restaurant evaluation. It aims to roviding a service ordering and delivery services to users and enable them to order Online meals.

**Project techniques:** React.js | Redux Toolkit | React Bootstrap | Bootstrap | Css  
[GitHub](#) [Live](#)

### FAV-PAGES-FEED

I have developed a Favorite pages feed project for social networking. The project is a platform that allows users, after logging in, to go to the profile page, upload posts, view posts, search, explore, interact, comment, and display notifications to users about interactions with their posts.

**Project techniques:** Next.js | sass  
[GitHub](#) [Live](#)
